## FACTIONS AND ALLEGIANCES

When determining Allegiance, a Detachment selected from this Army List will be of the Xenos faction and T'au Empire sub-faction.

When determining the Level of Alliance for a T'au Empire detachment, refer to the following list:

Sworn Brothers: T'au Auxillaries, Demiurg.

Fellow Warriors: Asuryani, Saedath, Necrons, Orks, Astra Militarum, Imperialis Militia.

Distrusted Allies: Solar Auxillia, Talons of the Emperor, Mechanicum, Astartes Firstborn, Astartes Primaris, Legiones Astartes, Astartes Chaotica, Legiones Hereticus.

For the Greater Good Alone\*: Daemons of the Ruinstorm, Drukhari, Tyranids.

*\*Equivalent to 'By the Emperor's Order'*

Thanks to the Panoptica discord for the help and especially thanks to Filwilliamson who's always ready to talk about weird rule queries.

The changelog including all changes since the last version can be found on the last page of the book. Additionally, any changes since the last version are highlighted in magenta.

# T'AU WARLORD TRAITS

When selecting a Warlord Trait for a Warlord from the T'au army list, one from the following list may be selected:

## PURETIDE ENGRAM NEUROCHIP

At the start of each of the controlling player's turns, select one of the following special rules: Counter-Attack (1), Furious Charge (1), Monster Hunter, Fearless, or Sunder. The Warlord, and all models in their unit, gain the selected special rule until the start of the controlling player's next turn. In addition, an army whose Warlord has this trait may make one additional Reaction during each of the opposing player's Shooting phases.

## A GHOST WHO WALKS AMONG US

This Warlord Trait may only be selected for a Warlord equipped with a Jet Pack. When the Warlord's unit chooses to increase its Movement characteristic using its Jet Packs in the Movement phase, its Movement characteristic is increased by an additional 4", and the unit may also move an additional 4" when using its Jet Packs to move in the Shooting phase. In addition, an army whose Warlord has this trait may make one additional Reaction during each of the opposing player's Movement phases.

## SHORT BLADE, BROKEN SWORD

The Warlord's Weapon Skill and Initiative characteristics are changed to 5, and any Shooting Attacks made by the Warlord as part of a Reaction gain the Pinning special rule. In addition, an army whose Warlord has this trait may make one additional Reaction during each of the opposing player's Assault phases.

## THE SKILLED HUNTER GETS THE PREY

At the start of each of the Warlord's controlling player's Shooting Phases, that player can select one enemy unit to be the Warlord's Prey until the end of the current phase. The Warlord can re-roll all failed To Hit and To Wound rolls made for Shooting Attacks that target the Prey, and other models in the Warlord's unit can re-roll failed To Hit and To Wound rolls of 1 made for Shooting Attacks that target the Prey. However, other units in the Warlord's army may not target the Prey for a Shooting Attack during that Shooting Phase. In addition, an army whose Warlord has this trait may make one additional Reaction during each of the opposing player's Assault phases.

## EXEMPLAR OF THE SELFLESS CAUSE

An Aun'el or Aun'o must select this trait if they are an army's Warlord, and no other model may select this trait. Whilst the Warlord is on the battlefield, all friendly units with the T'au Empire subfaction in the controlling player's army that can draw line of sight to the Warlord re-roll failed Morale, Pinning, and Regroup tests, and are unaffected by the effects of the Fear special rule. In addition, an army whose Warlord has this trait may make one additional Reaction during any one phase of the opposing player's turn.

# TAU ADVANCED REACTION

This Advanced Reaction is available only to units as part of a T'au Empire Detachment. Unlike Core Reactions, it is activated in unique and specific circumstances, as noted in its description, and can often have game changing effects. Advanced Reactions use up points of a Reactive player's Reaction Allotment as normal and obey all other restrictions placed upon Reactions, unless it is specifically noted otherwise in their description.

## MASS COVERING FIRE

This advanced reaction can be used once per battle in the opposing player's Shooting Phase when an enemy unit makes a Shooting Attack targeting a unit they control, or in the opposing player's Assault phase when an enemy unit declares a Charge targeting a unit they control.

*Shooting Phase:* The Reacting unit may make a Shooting Attack, targeting the unit that triggered this Reaction and following all the usual rules for Shooting Attacks. A unit that makes a Shooting Attack as part of this Reaction may not make any attacks indirectly (without line of sight) including Barrage weapons or other weapons or special rules that otherwise ignore line of sight, and Vehicles may only fire Defensive weapons. Template weapons may only be used as part of this Reaction if the target unit is within 8" and must use the Wall of Death rule instead of firing normally. Units making a Shooting Attack as part of this Reaction are considered to be Stationary, and may fire weapons of any type as though they had not moved.

*Assault Phase:* The Reacting unit may make a Shooting Attack, targeting the unit that triggered this Reaction and following all the usual rules for Shooting Attacks. A unit that makes a Shooting Attack as part of this Reaction may not make any attacks indirectly (without line of sight) including Barrage weapons or other weapons or special rules that otherwise ignore line of sight, and Vehicles may only fire Defensive weapons. Template weapons used as part of this Reaction use the Wall of Death rule instead of firing normally. The unit targeted by the Shooting Attack may not take Cover Saves against Wounds inflicted as part of this Reaction. Units making a Shooting Attack as part of this Reaction are considered to be Stationary, and may fire weapons of any type as though they had not moved.

When making this Reaction, the controlling player may select any number of friendly units within 6" that have the Supporting Fire special rule and have not yet reacted during the current Phase. Each model in those units that have the Supporting Fire special rule may also shoot as part of that Shooting Attack.

If any models in a unit take part in a Shooting Attack using the Mass Covering Fire reaction, then that unit cannot make any Reactions for the rest of the current Phase.

# THE DOCTRINES OF WAR

Each model with the Doctrine of War (X) special rule will have a number of additional special rules and abilities specific to their Doctrine of War, whether Kauyon or Mont'ka. All models in a Detachment with the Doctrine of War (X) special rule must have the same Doctrine of War.

An army that includes a Primary Detachment with the T'au Empire subfaction may include Secondary Detachments, **including Allied Detachments**, with the same subfaction. However, in that case, all Secondary Detachments must select the other Doctrine of War; for instance, if an army's Primary Detachment has selected the Doctrine of War (Kauyon) special rule, Secondary Detachments in that army may be T'au Empire detachments that have selected the Doctrine of War (Mont'ka) special rule. Detachments selected this way have the Sworn Brother level of allegiance with each other.

## KAUYON: THE PATIENT HUNTER

When a model with the Doctrine of War (Kauyon) special rule makes a Shooting Attack as part of a Reaction, add 1 to the To Hit roll.

## MONT'KA: THE KILLING BLOW

Models with the Doctrine of War (Mont'ka) special rule may make a Shooting Attack after their unit has Run, but count their Ballistic Skill as 2 when making such attacks. Template weapons may only be fired if the target unit is within 8" and must use the Wall of Death rule instead of firing normally.

Vehicle models with the Doctrine of War (Mont'ka) special rule may fire two weapons without modification to their Ballistic Skill after moving at Cruising Speed, rather than one, and may fire one weapon without modification to their Ballistic Skill after moving Flat Out, unless they are Immobilized.

## ELITES

*As versatile as it is ubiquitous, the XV8 'Crisis' Battlesuit is the foremost symbol of the T'au Empire's military prowess. Striking perfect balance between offense, defense, and mobility, the suit is compatible with a dazzling arrays of mid-range weapons and support subsystems, all of which can be easily swapped around thanks to the armour's three moveable hardpoints. Taller than even an Ork Warboss and as heavily armoured as an Imperial Space Marine, the Crisis Battlesuit and its many variants have seen constant use over every sphere of expansion, finding niches to fulfill as battle tactics evolved and finding uses for equipment as T'au technology continued to develop.*

## ELITES

*An early variation on the XV8 chassis, the XV81 mounts an additional smart missile system while retaining full hardpoint compatibility. Considered difficult to pilot, the design was originally issued to overly zealous Shas'os in an effort to curtail the immense death rate among officers during the second sphere of expansion.*

## ELITES

*XV84 Battlesuits are mounted with a powerful markerlight system, allowing the armour to fulfill a supporting role while sacrificing only some of the power and versatility of other XV8 variants. The duties of XV84 pilots lead them to spend extended periods of time away from their cadres to prepare surprise attacks or to cover fighting retreats, and their pilots oft have a somber, though heroic, reputation.*

## ELITES

*The XV89 variant of the Crisis Battlesuit was an innovation of the Taros Campaign, and was the first Battlesuit designed for the purpose of assaulting heavily entrenched positions. Heavily armoured, but cumbersome, it was detested by many pilots and was eventually retired from use. Almost all XV89 battlesuits were recalled, later to be replaced with the XV8-02 and XV9 models. Only holdouts on the outer fringes of the T'au Empire continue to use these rare battlesuits.*

## ELITES

*The XV46 battlesuit is a recent developement in T'au battlesuit technology developped expressly for the exploration of Space Hulks. The many specialized systems built into the armour, including its unique suite of weaponry optimized for engagements in derelict voidships, have rendered the production of the suit difficult, and very few of these currently exist within the T'au Empire.*

## ELITES

*After the third sphere of expansion was brutally ended in the Damocles Gulf, the Earth Caste attempted to tame dangerous technologies in order to face the techno-arcane behemoths fielded by the enemies of the Empire. The result of these efforts was the Riptide Battlesuit, itself a powerful war engine built to house the newly developed Dark Matter Nova Reactor. Though the destructive energies of the Nova Reactor are usually kept under control, the possibility remains for the elite Shas'vres pilot to unleash the full potential of the warmachine – though doing so exposes them to deadly levels of radiation, this act of self-sacrifice is considered an honor if it is performed in furtherance to the ideals of the Greater Good.*

# **TROOPS & DEDICATED TRANSPORTS**

## TROOPS

*Fire Warrior ground troops are most commonly deployed in Strike Teams, high-speed deployment of shock troops which employ long-range pulse weaponry to quickly suppress and eliminate a target.*

*They are supported in these tasks by arrays of drone and powerful tactical support turrets.*

*Every Fire Warrior enters active duty as a Shas'la, a foot trooper. They are actively promoted based on their performance, and through displays of competence and adherence to the doctrine of the T'au'va will the best of them ascend to the rank of Shas'ui, commanding other Shas'las in the field and being allowed to pilot a battlesuit.*

  - Pulse Pistol.....+2 points
  - Bonding Knife.....+10 points
  - Markerlight and Target Lock .....+10 points

## TROOPS

*The other commonly deployed configuration of fire caste footsoldiers, Breachers employ incendiary pulse blasters to devastate entrenched positions at short range. This daring, but dangerous task is left to those Shas'las who demonstrate excessive zeal in their devotion to the T'au'va – either their inner fire will be tempered in the forge of close-quarter battle, or it will kill them.*

## TROOPS

*Pathfinders were the main scout troops of the T'au Empire. operating in reconnaissance operations too complex to be fulfilled by mere drones, a role for which they were held in high regard by every T'au caste.*

*Lighter armoured than their line counterparts, pathfinders carried pulse carbines, the withering fire of which not only serves to pin down the foe but to ensure the safe retreat of the Pathfinders. A Pathfinder's life was always under threat in the performance of their duties, and so they were equipped with specialized weaponry and a vast array of specialized drones for both reconnaissance and combat.*

## TROOPS

*The XV25 was the primary T'au Stealth Battlesuit. Standing little taller than a Fire Warrior in Combat Armour, the Stealth Battlesuit offered protection comparable to power armour, and came equipped a noise-suppressed jet pack, one weapon mount, and a subsystem-compatible hardpoint, all concealed by the suit's integrated cloaking fields. Fire Warriors piloting these suits were expert infiltrators, able to perform sabotage and assassinations while never seen by unfriendly eyes. Introduced as a replacement for the XV15 Stealthsuit, which it immediately rendered obsolete, one could measure the efficacy of the XV25 merely by recounting the tales of invisible killers which quickly spread ahead of the T'au Empire's expansion.*

## TROOPS

*The XV15 was the first model of Stealth Battlesuit, distinguishing itself throughout the great battles of the first and second spheres of expansion. The advent of the much-superior XV25 immediately antiquated its predecessor, and its usage dwindled rapidly, with the last widespread use of such suits dating back to the third sphere of expansion. By the time of the fifth sphere of expansion, only in times of true desperation would be the XV15 be brought out to the field to stalk the enemies of the Empire once again.*

## FAST ATTACK

*The Barracuda was the most common fighter jet used by the T'au Empire during the second sphere of expansion, and continued to see extensive use afterwards. Though slower than some of its counterpart, the Barracuda is highly maneuverable and extremely well-armed. The Barracuda is commonly equipped with a nose-mounted Swiftstrike Railgun, a version of that weapon optimized for use on flyers that can drop enemy aircraft out of the sky in one skillfully aimed shot, but some configurations have it exchanged for a nose-mounted Heavy Burst Cannon or a Ion Cannon to hunt down grounded targets.*

## FAST ATTACK

*The Razorshark Strike Fighter is a dedicated dogfighter, built from the same chassis as the Sun Shark but replacing the drone ports with additional thrusters and replacing the bomb generator with a quad ion turret. The turret can pivot three hundred and sixty degrees at high speed; in conjunction with the jet's optimized velocity trackers, the turret can continually strafe an aerial target even as its air caste pilot weaves away from firing range.*

*An iteration on the Riptide Battlesuit, the R'Varna has its origins in deception, when its Earth Caste creator appropriated resources meant for Stealthsuit developement to the creation of these hulking artillery battlesuits. Despite this ignominy, the R'varna proved its worth on the field of battle, first against the hordes of Hive Fleet Gorgon then many times thereafter.*

*The R'varna integrated the shield systems mounted on the Riptide's arm to its frame, resulting in a bulkier, clumsier design overall, and used the newly freed up arm mount to double up on Pulse Submunition Cannons for maximal suppressive firepower, further enhanced by the Nova Reactor brought over from the Riptide design.*

# **T'AU AUXILIARIES**

## USING THE AUXILLIARY ARMY LIST

The T'au Auxilliary army list is a separate army list from the main T'au empire list. For rules purpose, the T'au Auxilliary army list has the Xenos faction and the T'au Auxilliaris subfaction.

The T'au Auxilliaris army list is Sworn Brothers with the T'au Empire subfaction and Distrusted Allies with all other armies.

A Detachment selected from the T'au Auxilliary army list may only be a Secondary Detachment, and may never be a Primary Detachment.

#### OPTIONS

- The unit may take:
    - Up to 2 additional Great Knarlocs ..... +75 points per model
- For each additional Great Knarloc in the unit, the unit must include 4 additional Kroot Goads at no additional point cost.*
- All models with Kroot rifles with the unit may upgrade them to have:
    - Sniper Rounds ..... +? points per model
  - Any Great Knarloc in the unit may take:
    - Baggage Train ..... +? points per model

#### BEASTMASTERS

If all of the models with this special rule in a unit are removed as casualties, then any remaining models in that unit remain in play, but when selected during the Movement phase must move along a path of the controlling player's choice towards the enemy unit that is closest to the unit – only units that are in line of sight are counted when deciding which unit is closest. If there are no units within line of sight then the Militia Beastmaster unit becomes Pinned until the beginning of the controlling player's next turn. During the Assault phase, a Militia Beastmaster unit in which all of the Militia Handlers have been removed must make a Charge if any enemy units are within 12" and eligible targets for a Charge, but the controlling player may select which enemy unit is the target of the Charge. If the unit is locked in combat then it fights as normal.

- The Gue'vesa'ui may take:
  - Markerlight and Target Lock .....+10 points

#### STRENGTH IN NUMBERS

When a unit that is composed entirely of models with this special rule is selected as a Troops choice, then up to three such units may be selected to fill that Troops choice slot instead of only one.

All units selected in this manner count as part of the same Troops choice for the purposes of Army Selection and Deployment only; when deployed onto the battlefield or into Reserves they are counted as a single unit and all units selected as part of the same Troops choice must be deployed at the same time (but are not required to deploy in proximity with each other) – and if placed into Reserves then all units in that choice must be placed into Reserves. Likewise, when making Reserves rolls one roll is made for all units selected as part of the same choice.

Once deployed onto the battlefield, all units selected in this manner are treated as separate and distinct units or choices for any Primary or Secondary Objectives or other special rules and operate as separate units in all ways. Units selected as part of the same Troops choice may have different options selected for them, and are not required to be identical.

**COMMUNION HELM**

All models in a unit that includes any models with a Communion helm gain the Stubborn special rule so long as any friendly models from the T'au Empire army list are on the battlefield.

# APPENDICES

# T'AU UNIT TYPES

## BATTLESUIT TYPE

The following rules apply to all models with the Battlesuit unit Sub-Type:

- A model of the Battlesuit type may fire Heavy and Ordnance weapons and counts as Stationary even if it moved in the preceding Movement phase, and may declare Charges as normal regardless of any Shooting Attacks made in the same turn.
- No model that is not also of the Battlesuit Unit Type may join a unit that includes a Battlesuit model.
- Models with the Battlesuit type may be targeted for the Battlesmith special rule as if they had the Dreadnought sub-Type.

## DRONE SUB-TYPE

The following rules apply to all models with the Drone sub-Type:

- Models with both the Drone and Antigrav unit Sub-Types are equipped with a Drone Jet Pack.
- Models with the Drone unit Sub-Type are ignored when calculating Victory Points. For the purpose of calculating Victory Points, a unit is treated as having been destroyed if all non-Drone models in that unit have been destroyed. Your opponent never scores any Victory Points for destroying a unit that includes only Drone models.
- As long as a unit includes only models with the Drone unit Sub-Type, that unit automatically passes any Morale checks made in the Shooting phase.
- A model with the Drone Unit Sub-Type can shoot with Heavy and Ordnance weapons, counting as stationary, even if it moved in the preceding Movement phase.

## STEALTHED SUB-TYPE

The following rules apply to all models with the Stealthed sub-Type:

- Whenever targeted by a Shooting Attack, the range between an attacking unit and a unit that includes only models with the Stealthed Sub-Type is considered to be 6" further than the actual range between the two units – enemy models with the Night Vision special rule and models with the Primarch Unit Type ignore this effect.
- When attacked by a weapon with the Barrage special rule, a unit that includes only models with the Stealthed Sub-Type is always treated

as though it was out of line of sight when scattering any attacks.

## THIRD-LINE SUB-TYPE

The following rules apply to all models with the Third-line sub-type:

- When an Armour Penetration roll would inflict a Glancing Hit on a model with this Unit Sub-Type, it instead inflicts a Penetrating Hit.
- An enemy player may never score Victory points for the destruction of a model with this Unit Sub-Type; this includes models with this Unit Sub-Type that are selected as Lords of War.

## SKIRMISH SUB-TYPE

The following rules apply to all models with the Skirmish unit Sub-Type:

- A unit that includes only models with the Skirmish Sub-Type has a unit coherency range of 3" rather than 2".
- A unit that includes only models with the Skirmish Sub-Type increases all Cover Saves granted by terrain by one (i.e., from 6+ to 5+). This only increases existing Cover Saves and does not grant one when in terrain that does not normally grant a Cover Save. This rule cannot increase a Cover Save to better than 2+.

## MILITIA SUB-TYPE

The following rules apply to all models with the Militia sub-type:

- A unit that includes any models with the Militia sub-Type may only attempt to Regroup if that unit includes at least half of the models that it included at the beginning of the battle (not including any models that have joined the unit during play). If more than half of its models have been removed as casualties then it may not Regroup and must continue to Fall Back until it leaves play.
- A unit that includes any models with the Militia sub-Type that is Falling Back and is successfully Charged by an enemy unit is automatically removed from play as a casualty, with no Leadership test being made or dice rolled.
- A unit that includes any models that have the Militia sub-type, but not the Monstrous or Mechanised Unit Sub-Types, that is locked in combat and is then successfully charged by an additional enemy unit must make an immediate Morale check once the Charge has been resolved and as part of the Charge sub-phase.

If this Check is failed then the Militia unit must Fall Back as if it had lost combat – with any enemy units able to declare Sweeping Advances only if they are not locked in combat with any other units. Once this Fall Back and any Sweeping Advances are resolved, the Fight sub-phase continues as normal.

### **GARGANTUAN SUB-TYPE**

The following rules apply to all models with the Gargantuan Unit Sub-Type:

- Models with the Gargantuan Unit Sub-Type are not affected by special rules that negatively modify their Characteristics (other than Wounds).
- Models with the Gargantuan Unit Sub-Type are not slowed by Difficult Terrain and automatically pass Dangerous Terrain tests – but may not pass through or end their move in Impassable Terrain.
- Models with the Gargantuan Unit Sub-Type count as ten models for the purposes of determining if the model is outnumbered by another unit.
- Models with the Gargantuan Unit Sub-Type may only make Reactions triggered by models with the Armiger, Dreadnought, Primarch or Vehicle Unit Type, or any model with a Wounds Characteristic of 8 or more.
- Successful Wounds scored by attacks with the Poisoned or Fleshbane special rules must be re-rolled against models with the Gargantuan Unit Sub-Type.
- A model with the Gargantuan Unit Sub-Type may attack with all weapons they have in each Shooting Attack they make, including as part of a Reaction.
- A model with the Gargantuan Unit Sub-Type may make Shooting Attacks with Heavy and Ordnance weapons, counts as Stationary even if it moved in the preceding Movement phase, and may declare Charges as normal regardless of any Shooting Attacks made in the same turn.
- No model that does not have the Gargantuan Unit Sub-Type may join a unit that includes a model with the Gargantuan Unit Sub-Type.
- A model with the Gargantuan Unit Sub-Type ignores all effects (both detrimental and beneficial) of all Psychic Powers and cannot be Wounded or affected by any Attack with the Psychic Focus special rule. Weapons with the Force special rule that are used to make Attacks against a model with the Gargantuan Unit Sub-Type are not affected and are resolved normally.

### **EMPLACEMENT SUB-TYPE**

The following rules apply to all models with the Stealthed sub-Type:

- A model with the Emplacement Sub-Type has an Armour Value instead of Toughness Characteristic and a reduced profile to reflect its limited capabilities. Page 224 of *Warhammer: The Horus Heresy – Age of Darkness* Rulebook presents rules for making attacks against models with this Unit Sub-Type.
- A model with this Unit Sub-Type may never Move or be Moved by any special rule or effect – if it is forced to Move then it instead suffers the effects of the Total Collapse result on the Building Damage table.

# UNIT UPGRADE DRONES

Some units may purchase Drones as an upgrade. Drones purchased as an upgrade gain all Unit Sub-Types and special rules listed for the unit which purchased them as an upgrade (except for those special rules that specifically forbid it; this will usually be listed as ‘(except drones)’ in a unit’s entry), but do not gain access to any additional Wargear options available to that unit.

All Drones that can be purchased as unit upgrades have the Infantry (Drone, Antigrav) unit Type (and are therefore equipped with a Drone Jet Pack), and use the profiles shown on the following page. Other drones may be part of other units or form their own units, and are shown in their own unit entries. The point cost for purchasing a Drone as an upgrade is listed in the unit’s profile.

## INDEPENDANT CHARACTERS AND UNIT UPGRADE DRONES

If a model with the Independent Character special rule has taken any Drones as an upgrade, it may still join other units. If it does, its Drones also join that unit, even if that unit has a Unit Type that normally would forbid its Drones from joining that unit. If the Independent Character subsequently leaves the unit, all of its Drones also leave the unit, and form a separate unit with it. An Independent Character may never leave its Drones.

If an Independent Character is destroyed while part of a unit, its Drones cannot leave that unit for the remainder of the battle. If an Independent Character is destroyed while not part of another unit, its Drones may not join other units for the remainder of the battle (though another model with the Independent Character special rule may still join the Drones; however, as they are not its upgrades, it cannot join another unit while joined to that unit).

## ATTACHED DRONES

Some units include “Attached Drones” as part of their unit description, or may take Attached Drones as unit upgrades. When that is the case, those Drones are “Attached” to a model in that unit.

Whilst Attached to a Vehicle, a drone is treated in all regards as a passenger embarked upon a Vehicle, but does not count against a Vehicle’s Transport Capacity, and may be Attached even to a Vehicle with no Transport Capacity or a non-Vehicle model.

Whenever a non-Vehicle model with Attached Drones makes a Shooting attack, each Drone attached to that model can also shoot as part of that Shooting Attack, **not counting against the number of weapons the model is allowed to fire.**

Whenever a Vehicle with attached Drones makes a Shooting Attack, each Drone attached to that Vehicle can also shoot as part of that Shooting Attack, as if its weapons were Pintle-Mounted weapons on that Vehicle. When doing so, a Drone always uses its own Ballistic Skill **and does not count against the number of Weapons the Vehicle is allowed to fire at its full Ballistic Skill.**

If a model with Attached Drones is destroyed, all Drones attached to that model are destroyed as well.

## DETACHING DRONES

During the Movement Phase, a unit that includes only models with the Drone unit Sub-Type may Detach from a Vehicle it is Attached to, exactly as if it were passengers Disembarking from a Vehicle. When detaching from a Vehicle, treat the Front facing of the model as an access point, ignoring its other Access Points if it has any; when detaching from a non-vehicle model, treat the model’s base as an access point. Note that units containing models with the Drone unit Sub-Type may still embark upon a Vehicle normally if they so choose.

Detached Drones are treated as a new, separate unit in all regards. Attached Drones never grant Victory Points for being destroyed, even after Detaching.

Once Detached, Drones may not reattach to a model.

# MARKERLIGHT COUNTERS

Markerlight Counters are a type of marker that can be applied by weapons and special rules from the T'au Empire and T'au Auxillaries subfactions. If a rule or special rule says that a unit gains a Markerlight Counter, place a token or dice next to it for each Markerlight Counter that it gains. This token is ignored for all rules purposes, and is only used to keep track of the number of Markerlight Counters on each unit.

Each time a unit with the T'au Empire Subfaction makes a Shooting Attack, targeting a unit that has any Markerlight Counters, that unit gains benefits to that Shooting Attack, depending on the number of Markerlight Counters on that unit. Note that units without the T'au Empire faction do not gain any benefits from Markerlight Counters. In addition, several other rules or special rules may have different effects, based on the presence of Markerlight Counters on units; when that is the case, the rule or special rule in question will explain how it is affected by Markerlight Counters.

Markerlight Counters remain on the battlefield until the start of the next Shooting Phase of the controlling player of the unit that applied the Markerlights. At the start of each player's Shooting Phase, all Markerlight Counters that their units have applied since the start of their previous Shooting Phase are removed.

The benefits of Markerlight Counters are cumulative; for instance, if a unit makes a Shooting Attack targeting a unit with 3 Markerlight Counters, it gains both the Scour and Pinpoint benefits.

## **1+ MARKERLIGHT COUNTERS: SCOUR**

If a unit targets a unit with at least one Markerlight Counter for a Shooting Attack, then all attacks targeting that unit as part of that Shooting Attack gain the Ignores Cover special rule.

## **3+ MARKERLIGHT COUNTERS: PINPOINT**

If a unit targets a unit with at least three Markerlight Counters for a Shooting Attack, add +1 to the To Hit rolls made for that unit's ranged attacks that target that unit this phase, including Snap Shots, and the controlling player may re-roll any Scatter rolls made as part of a ranged attacks targeting that unit.

## **5+ MARKERLIGHT COUNTERS: EXPOSE**

If a unit targets a unit with at least five Markerlight Counters for a Shooting Attack, then all attacks made against that unit do not need Line of Sight (but are still required to be within range).

# CADRES OF BATTLE

This section presents a set of Cadres, powerful tactics and formations employed by the T'au in their quest to bring peace to a tumultuous galaxy.

Each Cadre presents one of these strategies, and is chosen when a player selects their army – before the start of a battle. The rules for each individual Cadre will present a number of Effects which will grant the Detachment new options or special rules, as well as a number of Limitations which will deny the Detachment access to certain options or rules it might otherwise be able to make use of. Unless otherwise stated as part of the Cadre's rules, all Effects and Limitations must be applied to models and units that are selected as part of the Detachment that it has been chosen for.

The Effects and Limitations of any given Cadre only apply to units and models in the Detachment it was chosen for – unless the Cadre specifically states otherwise. Where more than one Detachment in an army is eligible to choose a Cadre (i.e., has the T'au Empire subfaction, and includes at least one model with the Cadres of Battle special rule) then each Detachment may select a Cadre. Some Cadres may only be chosen for a Primary Detachment or a Secondary Detachment – such Limitations will be clearly stated as part of the Cadre.

## GAINING ACCESS TO CADRES

A Detachment that has the T'au Empire subfaction and fulfils at least one of the following conditions may use a Cadre:

- The Detachment includes at least one model with both the Cadres of Battle special rule;
- The Detachment can upgrade at least one model from the Detachment to have the Cadres of Battle special rule as noted in a specific Cadre that allows this.

## CADRES AND THE DOCTRINES OF WAR SPECIAL RULE

All Cadres are marked as a Kauyon Cadre or a Mont'ka Cadre in brackets after the name of the Cadre. When selecting a Cadre, all units in the Cadre with the Doctrine of War (X) special rule must select the Doctrine of War corresponding to the doctrine in brackets in the Cadre's name.

If an army's Primary Detachment select a Cadre, then any Secondary Detachments in the army that selects a Cadre may not select a Cadre with the same Doctrine of War. For example, if an army's Primary Detachment has a (Kauyon) in brackets after its name, then Secondary Detachments in the same army may only select (Mont'ka) Cadres, and conversely.

# KAUYON CADRES

## ARMoured INTERDICTION CADRE (KAUYON)

### EFFECTS

- TX7 Hammerhead Gunship Squadrons in the Detachment gain the Line unit Sub-Type.
- At the start of each of the enemy player's turns, the controlling player selects a 5" area of the battlefield (mark that area with a 5" Large Blast marker) until the start of the enemy player's next turn.
- Each time a Vehicle unit from the Detachment shoots as part of a Reaction (including using the Supporting Fire special rule), if the unit that triggered the reaction has any models within the marked area when the Reaction is declared, models in the reacting unit can fire with all of their weapons, not just defensive weapons, and that Reaction does not count towards the controlling player's maximum number of Reactions for that phase.
- At the start of the controlling player's Shooting Phase, each enemy unit that has any models within the marked area gains a Markerlight Counter.

### RESTRICTIONS

- In a Detachment using this Cadre, a single TX7 Squadron, composed of only a single model, must be selected as a HQ choice. This unit must be the only HQ unit in the Detachment and must select the XV02 Pilot Battlesuit upgrade at an additional cost of +20 points, as described below. If the Detachment is your Primary Detachment, then that model must be your army's Warlord, even though it has the Vehicle type, and must select the Hammerhead Ace Warlord Trait, as described below.
- No units in the Detachment may be held back in reserves, unless otherwise specified by mission rules.
- The Detachment must include more Vehicle units than it does Battlesuit units.

## XV02 PILOT BATTLESUIT

A model with a XV02 Pilot Battlesuit gains the Night Vision and Cadres of Battle special rule, has a 5+ invulnerable save, and, if it makes a Shooting Attack as part of a Reaction, it may fire with all of its weapons, not just Defensive weapons.

## WARLORD TRAIT: HAMMERHEAD ACE

A Warlord with this trait changes its Ballistic Skill characteristic to 5 and gains the Preferred Enemy (Vehicles, Dreadnoughts and Mechanised) special rule. In addition, an army whose Warlord has this trait may make one additional Reaction during each of the opposing player's Shooting phases.

## COUNTERSTRIKE CADRE (KAUYON)

### EFFECTS

- Fire Warrior Pathfinder Teams in the Detachment lose the Support Squad special rule, and any Pathfinder Squads in the Detachment that are selected as Compulsory Troops gain the Line unit Sub-Type.
- Fire Warrior Pathfinder Teams, Fire Warrior Strike Teams and Fire Warrior Breacher Teams in the Detachment can re-roll failed To Hit rolls of 1 if the target unit has at least half of its models within 6" of an Objective.
- TY7 Devilfishes in the Detachment gain the Outflank and Deep Strike special rules.
- During the first turn of battle, and during any turn in which such a model arrived from reserves, TY7 Devilfishes in the Detachment gain the Fast unit Sub-Type.

### RESTRICTIONS

- All units in the Detachment that can select a TY7 Devilfish as a dedicated transport must do so.
- The Detachment must include more TY7 Devilfishes than it does Battlesuit units.

## **FIREBASE SUPPORT CADRE (KAUYON)**

### **EFFECTS**

- X81 Crisis Heavy Support Teams and XV88 Broadside Battlesuit Teams in the Detachment may be selected as non-Compulsory Troops choices, with any unit selected as a Troops choice this way gaining the Line unit sub-Type.
- Each time a X81 Crisis Heavy Support Team, XV88 Broadside Battlesuit Team, XV104 Riptide Battlesuit Team, XV107 R'Varna Battlesuit Team or XV109 Y'vakra Battlesuit Team in the Detachment makes a Shooting attack in the controlling player's Shooting Phase, the controlling player can select any such units from the Detachment that have not yet shot in that phase to make a coordinated strike with that unit. If a player does, then resolve the Shooting Attacks of all selected units at the same time, as if a single unit was making a Shooting Attack. Reactions triggered by that Shooting Attack must target a single unit taking part in the coordinated strike.

### **RESTRICTIONS**

- The Detachment may not include any Vehicle models.
- Units in the Detachment may not deploy using the Infiltrate special rule, may not be redeployed using the Scout special rule, and may not be placed in a Flanking Assault.
- The Detachment must include at least one Fortification choice.

## **RETALIATION CADRE (KAUYON)**

### **EFFECTS**

- XV8 Crisis Battlesuit Squadrons in the Detachment may be selected as Troops choices.
- If the Detachment has any units held as part of a Deep Strike Assault, the controlling may declare that the Deep Strike Assault is a low altitude deployment. If they do so, then the Deep Strike Assault automatically arrives at the start of the controlling player's second turn, without having to roll for reserves; however, after all models have been placed as part of the Deep Strike Assault, each model that is part of the Deep Strike Assault must take a Dangerous Terrain test.
- Battlesuit units in the Detachment that enter play via Deep Strike Assault increase their Ballistic Skill by +1 and gain the Line unit Sub-type until the end of the turn they entered play via Deep Strike Assault.

### **RESTRICTIONS**

- The Detachment must include more Battlesuit units than it does Vehicle units.
- Only XV8 Crisis Battlesuit Squadrons may be selected as Compulsory Troops choices for the Detachment.
- Half or more of all units in the Detachment that can take part in a Deep Strike Assault must do so.

## **SKYSWEEP CADRE (KAUYON)**

### **EFFECTS**

- TX78 Sky Ray Gunships Squadrons in the Detachment may be selected as Non-Compulsory Troops choices. All units selected as Troops choices this way gain the Line unit Sub-Type.
- All models in the Detachment within 12" of any TY71 Command Devilfish from the Detachment gain the Shrouded (5+) special rule against Shooting Attacks made by models with the Antigrav, Skimmer, and Flyer sub-Types.
- TX78 Sky Ray Gunships and Drone Sentry Turrets in the Detachment may take an Early Warning Override at an additional cost of +5 points per model.

### **RESTRICTIONS**

- The Detachment must include at least TY71 Command Devilfish. That model gains the Cadres of Battle special rule and loses the Support Squad special rule. If the Detachment is a Primary Detachment, then that model must be your army's Warlord, even though it is a Vehicle model, and must select the Skysweep Orchestrator Warlord Trait, as described below.
- The Detachment must include more TY78 Sky Ray Gunships Squadrons than it does Battlesuit units.
- The Detachment may only include one Fast Attack choice.

### **SKYSWEEP ORCHESTRATOR**

Each time a TX78 Sky Ray Gunship Squadron in the Detachment makes a Shooting Attack during the controlling player's Shooting Phase, the Return Fire Reaction, or the Interceptor reaction, whilst it is within 12" of the Warlord, place 1 Markerlight Counter on the primary target of the Shooting Attack or the Reaction before resolving it. In addition, an army whose Warlord has this trait may make one additional Reaction during each of the opposing player's Shooting phases.

# MONT'KA CADRES

## AIR CASTE SUPPORT CADRE (MONT'KA)

### EFFECTS

- AX3 Razorshark Strike Fighters and AX39 Sun Shark Bombers in the Detachment may be selected as Troops choices, rather than Fast Attack.
- Flyer models in the Detachment ignore the effects of the Shaken and Stunned results on the Vehicle Damage Table.
- Flyer models in the Detachment, except Lumbering Flyers, may take a Networked Markerlight at an additional cost of +15 points per model.
- At the start of the controlling player's Shooting phase, that player rolls a D6 for each Flyer model in the Detachment that is held in reserves and is equipped with at least one Markerlight weapon. For each result of 4+, that player can select an enemy unit that is within 24" of a battlefield edge. That unit gains a Markerlight counter.

### RESTRICTIONS

- In a Detachment using this Cadre, a single AX3 Razorshark Squadron or AX39 Sun Shark Bomber Squadron, composed of only a single model, must be selected as a HQ choice. This unit must be the only HQ unit in the Detachment and must select the Kor'o Admiral upgrade at an additional cost of +30 points, as described below.
- All models in the Detachment must have the Flyer unit Type or the Drone unit Sub-type.
- The Detachment may not be a Primary Detachment.

### KOR'O ADMIRAL

A model with this upgrade gains the Cadres of Battle special rule, gains a 5+ invulnerable save, and its Ballistic Skill is changed to 5.

## FIRESTREAM CADRE (MONT'KA)

### EFFECTS

- TX3 Pathfinder Tetra Squadrons, TX4 Piranhas Scout Squadrons and TX42 Piranha Hunter Squadrons in the Detachment must be selected as Troops choices, rather than Fast Attack. Any TX4 Piranha Scout Squadrons that are selected as Compulsory Troops in this way gain the Line unit Sub-Type.
- At the end of each of the controlling player's Movement phases, for each TX3 Pathfinder Tetra Squadron, TX4 Piranhas Scout Squadron and TX42 Piranha Hunter Squadron that is within 3" of a battlefield edge, the controlling player can remove that unit from the battle (it is not treated as having been removed as casualties) and place a new unit, identical to that unit at the start of the battle, in reserves. If they do so, that unit automatically arrives from reserves during their next turn, without having to roll for reserves.
- At the start of each of the controlling player's Shooting phases, if any TX3 Pathfinder Tetra Squadrons, TX4 Piranhas Scout Squadrons and TX42 Piranha Hunter Squadrons in the Detachment are on the battlefield, that player can select an enemy unit. That unit gains 1 Markerlight Counter.

### RESTRICTIONS

- Only TX4 Piranha Scout Squadrons may be selected as Compulsory Troops in the Detachment.
- The Detachment may only include a single Heavy Support and a single Elites choice.

## INFILTRATION CADRE (MONT'KA)

### EFFECTS

- Fire Warrior Pathfinder Teams and XV25 Stealth Battlesuit Teams in the Detachment lose the Support Squad special rule, and any such units in the Detachment that are selected as Compulsory Troops gain the Line unit Sub-Type.
- If any unit from the Detachment is entirely destroyed and removed as casualties, then all of the controlling player's units that are held in reserves, including any Flanking Assault or Deep Strike Assault, automatically arrive from reserves at the start of their next turn, without having to roll.

### RESTRICTIONS

- All units in the Detachment, except Stealthed units and Fire Warrior Pathfinder Teams, must be held in reserves at the start of battle.
- The Detachment must include units as part of a Flanking Assault, a Deep Strike Assault, or both.
- The Detachment may only include one Heavy Support choice.

## OPTIMISED STEALTH CADRE (MONT'KA)

### EFFECTS

- XV25 Stealth Battlesuit Teams selected as part of the Detachment lose the Support Squad special rule and gain the Line unit Sub-Type.
- All models in XV25 Stealth Battlesuit Teams, XV95 Ghostkeel Battlesuit Teams and Shas'o in XV22 Stealth Suit units gain the Scout and Wall of Mirrors special rule.

### RESTRICTIONS

- Only XV25 Stealth Battlesuit Teams may be selected as Compulsory Troops for the Detachment.
- The Detachment can only include a single Heavy Support choice.
- All units in the Detachment With the Doctrine of War (X) special rule must have the Doctrine of War (Mont'ka) special rule.

### WALL OF MIRRORS

Each time a model with this special rule makes a Shooting Attack, if that model is equipped with a X95 Ghostkeel Battlesuit or its unit is within 3" of a friendly model equipped with a XV95 Ghostkeel Battlesuit, that attack gains the Ignores Cover special rule and always hits Vehicles on their lowest Armour Value, regardless of the Attack's facing.

## VX 1-0 DRONE NET CADRE (MONT'KA)

### EFFECTS

- Drone Squadrons in the Detachment lose the Support Squad special rule and gain the Line unit Sub-Type.
- Units with the Independant Drone Brigade special rule in the Detachment also gain the Scouts special rule.
- Units with the Independant Drone Brigade special rule in the Detachment gain +1 to their Ballistic Skill during the controlling player's Shooting Phase when making a Shooting Attack targeting a unit has already been targeted for an attack by Drone model from a different unit in the same phase.

### RESTRICTIONS

- Only Drones Squadrons may be selected as Compulsory Troops in the Detachment.
- All units in the Detachment must include at least one Drone model, have Unit Upgrade Drones, or start the battle with Attached Drones.
- The Detachment may not be a Primary Detachment.

# T'AU EMPIRE SPECIAL RULES

## AIR CASTE HUNTER CADRE

A unit or model with this special rule may be placed into Combat Air Patrol at the beginning of the battle, before any models are deployed onto the table. Models assigned to Combat Air Patrol are not deployed onto the battlefield and remain in Reserves – however, no Reserves rolls are made for these models. Instead, the controlling player gains access to the Combat Air Patrol Advanced Reaction:

### ADVANCED REACTION – COMBAT AIR PATROL

This Advanced Reaction may be played whenever any enemy model that has the Vehicle Unit Type and the Flyer Unit Sub-type enters the Battlefield from Reserves. The Reactive player may nominate any one model that has been assigned to Combat Air Patrol. Once the enemy model with the Vehicle Unit Type and Flyer Unit Sub-type that triggered this Reaction has finished any and all Movement as it is brought into play, the chosen model assigned to Combat Air Patrol is brought into play from any point on the edge of the battlefield, moving into play as if it had entered play from Reserves. Once the Combat Air Patrol model has finished its Movement, it may immediately make a Shooting Attack targeting the enemy model that triggered this Reaction – as long as it has finished its Movement with a line of sight to that model.

Only models with the Vehicle Unit Type and Flyer Unit Sub-type may make the Combat Air Patrol Reaction.

## AUXILLIARY COMMAND (X)

A model with this special rule may never be an army's Warlord.

When creating a Detachment that includes any models with this special rules, select one model with this special rule to be the army's Auxilliary Commander. That model may select one Auxilliary Command trait from the Auxilliary Command Traits list.

Additionally, all models in the same Detachment as the Auxilliary Commander that have a different Auxilliary Command (X) special rule than it gain the Support Squad special rule.

## AUXILLIARY LIAISON

An army that includes any models with this special rule may select up to three units from the T'au Auxillaries army list as non-compulsory choices as part of the same Detachment as the model with this special rule (if these units select a Dedicated

Transport, it must also be selected from the T'au Auxillaries army list). Any units that are included in an army due to this special rule lose the Auxilliary Command (X), Fieldcraft (X) and The Human Element special rules, if they have them, and gain the Doctrines of War (X) special rule.

## CADRES OF BATTLE

If a Detachment with the T'au Empire subfaction includes at least one model with the Cadres of Battle special rule then that Detachment may select a single Cadre. Cadres are presented in the Cadres of Battle section.

## CLUSTER FIRE (X)

When resolving how many Hits are inflicted to a unit by a Blast or Template weapon with this special rule, a unit suffers a number of hits equal to the value in brackets for each of its models under the template, rather than just one.

## DEFENSE GRID

A unit that includes only models with this special rule has a Unit Coherency of 4" rather than 2".

A unit that includes any models with this special rule may not Embark upon any Transport.

## DEFENSIVE ARRAY

When a model with this special rule makes a Shooting Attack, it may target different units with each of its weapons that have a Strength of 6 or less.

## DEVILFISH TURRET MOUNT

A Bulky model with this special rule can embark upon a TY7 Devilfish, even though that model has the Infantry Transport special rule. Whilst a model with this special rule is embarked upon a TY7 Devilfish, it does not count against that model's Transport Capacity.

## ETHEREAL GUARDIANS

A unit with this special rule may only be selected as part of the same Force Organization Slot as a model with the Failure is Not an Option special rule (referred to as the Ethereal for the purpose of this special rule). Ethereal Guardians are treated in all ways as always part of the Ethereal's unit. The Ethereal may still join and leave other units, in which case the Ethereal Guardians join and leave units with them; if the Ethereal is slain while it has joined a unit, the Ethereal Guardians may not leave that unit until the end of the battle.

## FAILURE IS NOT AN OPTION

An army may only include a single model with this special rule. Any Unit Upgrade Drones selected as an upgrade by a model with this special rule do not gain this Special Rule.

All units from the T'au Empire subfaction within 12" of a friendly model with this special rule use its Leadership characteristic when taking Morale or Pinning checks, and their Leadership characteristic may not be negatively modified. However, should a model with this special rule be destroyed, all units from the T'au Empire Subfaction within 12" must take an immediate Pinning check.

Additionally, a model with this special rule may select a unit with the Ethereal Guardians special rule as a Retinue Squad, as described in the Ethereal Guardians special rule.

## FIELD CRAFT (X)

If a Detachment contains any models with this special rule, the controlling player selects a Fieldcraft to apply to all models with this special rule. The only Fieldcraft available in this army list is Fieldcraft (P'ech).

### FIELD CRAFT (P'ECH)

If a unit begins its turn with a majority of its models within Area Terrain (including the inside of a Ruin, for instance), all models with the Fieldcraft (P'ech) special rule in that unit increase their Movement characteristic by 2 for the duration of that Movement phase.

## HONOUR GUARD

Whilst a unit with this special rule has been joined by a model with the Independant Character special rule from the same Detachment, all models in that unit gain the Stubborn special rule.

## INVOCATION OF THE ELEMENTS

At the start of the controlling player's Movement phase as the active player, that player can choose one of the four Invocations below for one model with this special rule in their army. That model, and all models with the same Doctrine of War (X) special rule that are in units within 12" of this model, gain the benefits of that Invocation until the start of the controlling player's next Movement phase.

- **Calm of Tides:** Affected models gain the Stubborn special rule.
- **Storm of Fire:** The Strength of Pulse Weapons used by affected models is increased by 1.
- **Sense of Stone:** Affected models gain the Feel No Pain (6+) special rule.
- **Zephyr's Grace:** Affected models gain the Fleet (2) special rule.

## INDEPENDANT OPERATIVES

When deployed onto the battlefield (either at the start of the battle or when arriving from Reserves), all models with this special rule in a unit must be placed within unit coherency, and separated into groups. Each group must contain at least one model without the Drone unit Sub-Type and up to two models with the Drone unit Sub-Type. Afterwards, each group operates independently and is treated as a separate unit.

## GIGANTIC TARGET

Shooting attacks targeting a Zooming Flyer with this special rule are not resolved as Snap Shots, even if the firing model does not have the Skyfire special rule (if the firing model would have to fire Snap Shots for any other reason, it still does so.)

## GUIDED DESTRUCTION

A weapon with this special rule adds +1 to its Strength for each Markerlight Counter on the target unit. If this would bring the Strength of the weapon to 12 or more, resolve that attack as a Destroyer attack.

## GRAND INVOCATION

Each time the controlling player selects the Invocation of the Elements for a model with this special rule, that player can select two Invocations, rather than one, and apply the effects of both.

## MARKED FOR DEATH

At the start of the battle, once both armies have set up all their models, including any units with the Infiltrator special rule, a single enemy unit may be chosen by a player that controls any models with this special rule – this unit is considered 'marked for death'. When any models with this special rule controlled by that player are used to make an attack of any kind against the enemy unit their controlling player has 'marked for death', all failed To Wound rolls of '1' may be re-rolled.

## MEDICAL TECHNICIANS

Fire Warriors Medical Technicians are selected as any other unit, using up a single Force Organisation slot and bought in the same manner. However, before the first turn begins and any models are deployed to the battlefield, all Medical Technicians Shas'las must be assigned to another unit from the same Detachment of the army they were selected as part of. Medical Technicians Shas'las can be assigned to Fire Warrior Strike Teams, Fire Warrior Breacher Teams, Fire Warrior Pathfinders and Fire Warrior Honour Guard units. No more than one Medical Technician Shas'la may be assigned to any given unit.

Once assigned to a unit, the Medical Technician Shas'la is considered part of that unit and may not leave it under any circumstances – if that unit is removed as a casualty then the Medical Technician Shas'la is removed as well. In battles using Victory points, no Victory points are ever scored for removing a Medical Technician Shas'la as a casualty.

When assigned to a unit, a Medical Technician Shas'la gains all of the special rules (with the exception of those that specifically forbid it) and Unit Sub-types listed for the unit to which it is attached, but does not gain access to any additional Wargear options available to the unit to which it is assigned.

### MOBILE DEFENSE POSITION

The controlling player of a Fortification with this special rule may move any or all of its components up to 6" in their Movement save, so that it ends this Movement more than 1" from enemy models and other terrain. If they do so, any models on the Fortification's Battlements moves with the Fortification. Any model moved this way may still move during the same Movement save, but may not Run or Charge in the same turn and always counts as having Moved for the purpose of firing ranged weapons even if it did not move further in the same turn.

A Fortification may not be moved if any enemy units are on its Battlements, or if any friendly units on its Battlements are engaged in close combat, pinned, or falling back.

### MONUMENT TO THE GREATER GOOD

A model with this special rule ignores the effects of the Poisoned and Fleshbane special rules. In all cases, weapons which benefit from these special rules must attempt to damage a model with this special rule normally using the attack's Strength value. In addition, all friendly units from the T'au Empire and T'au Auxillaries army lists with at least one model within 24" of a model with this special rule gain the Fearless special rule.

### NOVA-CHARGE

A weapon profile with this special rule can only be used by a unit with the Nova Reactor special rule that has successfully activated its Nova Reactor in that turn.

### NOVA REACTOR

At the start of the controlling player's Movement phase as the active player, a unit that includes any models with this special rule can activate its Nova Reactors. Roll a D3 for each model in the unit with

this special rule: for each result of 1, the model suffers D3 Wounds against which no saves or damage mitigation rolls of any kind may be taken.

Regardless of the results, the models' Nova Reactors are Activated.

A unit with Activated Nova Reactors may choose to use the Nova-Charge profiles on any of its ranged weapons when making a Shooting Attack. In addition, a unit with Activated Nova Reactors may move an additional 4" when moving using its Jet Pack in the Shooting Phase.

### PRIDE OF THE SHAS'O

An army may only include a maximum of one unit with this special rule per 1,000 points. This counts across all Detachments of an army.

Additionally, a unit with this special rule may select a unit with the Shas'o Retinue special rule as a Retinue Squad, as described in the Shas'o Retinue special rule.

### FIRE CASTE VANGUARD SHOAL

A unit that includes any models with this special rule may not join or be joined by any model that does not also have this special rule, nor have any unit assigned to it using a special rule (such as the Medical Technicians special rule). In addition, a unit that includes any models with this special rule never counts as a Scoring unit or a Denial unit regardless of any other special rules or Mission rules in use – however, a model with this special rule may re-roll all failed Shrouded Damage Mitigation rolls.

### SEEKER

A weapon with this special rule cannot be fired, except using the following procedure.

Each time a unit makes a Shooting Attack targeting a unit with any Markerlight Counters, it can shoot a number of weapons with this special rule up to the number of Markerlight Counters on the target unit, in addition to any other weapons they would normally be able to fire. Ranged attacks made this way:

- Are resolved at BS5, ignoring all modifiers to the model's Ballistic Skill;
- Never fire Snap Shots;
- Do not need Line of Sight to their target;
- Have unlimited range;
- Do not reduce the number of weapons a Vehicle can fire at its full Ballistic Skill.

## SHAPER COUNCIL

A Shaper council is selected as any other unit, using up a single Force Organisation slot and bought in the same manner. However, before the first turn begins and any models are deployed to the battlefield, all models in a Shaper council must be assigned to another unit from the same Detachment of the army they were selected as part of that has the same Fieldcraft (X) special rule. Shapers that have not selected a Krootox or a Knarloc may not be assigned to Cavalry units, and Shapers that have not selected a Knarloc may not be assigned to Infantry units. Shapers that have selected a Krootox or Knarloc must be assigned to Cavalry units that are equipped with the same mount. A Shaper that joins a unit that includes any models with the Beastmaster special rule also gains the Beastmaster special rule. No Shaper may be assigned to any unit that includes one or more models with the Independent Character special rule or Unique Sub-Type (but such models may join a unit that includes a Shaper as normal during either deployment or any following turn). No more than one Shaper may be assigned to any given unit.

Once assigned to a unit, the Shaper is considered part of that unit and may not leave it under any circumstances – if that unit is removed as a casualty then the Shaper is removed as well. In battles using Victory points, no Victory points are ever scored for removing a Mek as a casualty. When assigned to a unit, a Shaper gains all of the special rules (with the exception of those that specifically forbid it) and Unit Sub-Types listed for the unit (except the Monstrous sub-Type) to which it is attached, but does not gain access to any additional Wargear options available to the unit to which it is assigned.

## SHAS'O RETINUE

A unit with this special rule may only be selected as part of a Detachment that includes at least one model with the Pride of the Shas'o special rule. A unit selected in this manner is considered a 'Retinue Squad' and the model with the Shas'o Retinue special rule is referred to as the Retinue Squad's Leader for the purposes of this special rule. The Retinue Squad does not use up a Force Organisation slot and is considered part of the same unit as the model selected as its Leader. The Retinue Squad must be deployed with the model selected as its Leader deployed as part of the unit and the Leader may not voluntarily leave the Retinue Squad during play. A unit that includes any models with this special rule may not be selected as part of an army without a Leader.

## SUPPORTING FIRE

Each time a unit makes the Return Fire or Overwatch Reaction, the controlling player can select one friendly unit with the Supporting Fire special rule within 6" of that unit that have not yet reacted during this phase. Each model in that second unit that has the Supporting Fire special rule can also shoot as part of that Shooting Attack, targeting the unit that triggered the reaction.

If any models in a unit take part in a Shooting Attack using the Supporting Fire special rule, then that unit cannot make any Reactions for the rest of the current Phase.

## TARGET ACQUIRED

Each time a unit makes a Shooting Attack, all models in the unit that are shooting with weapons that have this special rule must do so immediately, before resolving the unit's Shooting Attack but after any Reactions are declared.

For each Hit inflicted with a weapon with this special rule, do not roll To Wound; instead, the target unit gains 1 Markerlight Counter for each hit inflicted by a weapon with this special rule.

Once all models in the unit that are using Target Acquired weapons have fired, proceed with the Shooting Attack as normal, including resolving any Reactions. The unit gains all benefits from Markerlight Tokens that are present on the target unit.

Note that firing a weapon with the Target Acquired special rule still counts as making a ranged attack, even though it is done before the unit's Shooting Attack, and so the model may not shoot with another ranged weapon unless it has the Firing Protocols (X) special rule or another rule allows it to fire more than one weapon in the same Shooting phase.

## THE HUMAN ELEMENT

If a T'au Auxillaries Detachment includes any units with this special rule, that Detachment may select a single Provenance of War (from the Imperialis Militia army list) and have its effects apply to all appropriate units with the Auxilliary Command (Human) special rule in the Detachment.

Additionally, a T'au Auxillaries Detachment that includes one or more models with this special rule may include up to 3 non-HQ units selected from the Imperialis Militia army list. Units selected in this manner are treated as having the Xenos faction and T'au Auxillaries sub-faction, and gain the Auxilliary Militia and Auxilliary Command (Human) special rules.

## **VOLLEY OF FIRE**

If a unit that includes a model with this special rule has not moved or Run during the Movement phase of its controlling player's turn then that model may add one to the number of shots fired when making a Shooting Attack with a Pulse Rifle, a Pulse Carbine or a Pulse Blaster.

## **WAR OF MINDS**

Once per turn, when an enemy unit declares a Shooting Attack, Charge, or Reaction targeting at least one unit that includes any models with this special rule as a target, you can make that unit take a Leadership test. If that test is failed, that unit cannot make that Shooting Attack, Charge, or Reaction, targeting that unit; if any other units would be eligible as a target, your opponent may select that unit as a target instead. Enemy units that include any models with the Stubborn or Fearless special rules cannot be affected by this special rule.

## **WRATHFUL BLOWS**

A model making Attacks with a weapon with this special rule makes an amount of Attacks equal to the number shown in brackets, regardless of their Attacks Characteristic and any bonuses gained for Charging.

# T'AU EMPIRE RANGED WEAPON PROFILES

## AUTO WEAPONS

All weapons listed here are counted as 'Auto' weapons for those rules that affect such weapons.

| WEAPON              | RANGE | STR | AP | TYPE                                   |
|---------------------|-------|-----|----|----------------------------------------|

## PULSE BLAST WEAPONS

All weapons listed here are counted as 'Pulse' weapons for those rules that affect such weapons. An attack made with a pulse blast weapon has a number of different profiles, the use of which depends upon how far the chosen target is from the attacking model up to the weapon's maximum range. When attacking with one of these weapons, measure the shortest distance to the target unit and use the corresponding profile for the remainder of the attack. When attacking using a profile that uses a blast marker, that blast marker cannot be placed outside of its profile's range, but is not replaced even if it scatters outside of its profile's range.

# T'AU MELEE WEAPON PROFILES

## CEREMONIAL WEAPONS

When a model has two equalizers, that model gains +2 Attacks instead of the usual +1 Attack for using an additional weapon in combat.

| WEAPON       | RANGE | STR  | AP | TYPE                                                   |

# T'AU EMPIRE WARGEAR

## AUXILLIARY COMMS RELAY

While at least one model with an Auxilliary Comms Relay is present on the battlefield and not Embarked in a Vehicle or Building, the controlling player may re-roll any Scatter rolls made (whether as part of a weapon attack or the deployment of a model or unit), as long as the model with the Auxilliary Comms Relay has line of sight to the unit targeted by the attack or the point chosen as the target of the deployment. In addition, a unit that includes at least one model with an Auxilliary Comms Relay ignores the -1 penalty to Leadership imposed by the Night Fighting rules.

## BAGGAGE TRAIN

A model with a Baggage Train's Attacks characteristic is reduced by 1, its Armour Save is changed to 4+, and it gains the Line unit sub-Type.

## BONDING KNIFE

A unit that includes at least one model with a Bonding Knife adds +1 to its Leadership when taking Regroup tests. In addition, a unit that includes at least one model with a Bonding Knife that would be forced to move off the edge of the battlefield by a Fall Back move will instead stop moving, with any model that would have moved off of the battlefield ending its Fall Back move prematurely when it reaches 1" from the edge of the battlefield.

## COMMAND-LINK

At the start of the controlling player's Shooting phase, that player can select another friendly unit within 12" of the model with the Command-link. That unit can re-roll failed To Hit rolls of 1 until the end of that Shooting phase.

## DRONE JET PACK

A Drone Jet Pack counts as a Jet Pack, except the model does not gain the Bulky special rule.

## ELECTROWARFARE SUITE

Whilst a unit includes at least one model with an Electrowarfare Suite, that unit is always considered to be 3" further away than it actually is when measuring range to it from any enemy model for the purpose of resolving a Shooting Attack, Charge or any Reaction declared by an enemy model or unit (this is cumulative with any other modifiers to range imposed by special rules, such as Night Fighting, or Wargear).

## EMP GRENADES

The controlling player may choose to have a model with EMP Grenades that is Engaged or otherwise in base contact during the Assault phase with a Building or Fortification, or a model with the Vehicle, Dreadnought or Automata Unit Type, inflict one automatic Hit at S2, AP- with the Haywire special rule in Initiative Step 1 instead of attacking normally. Any model in a unit that is chosen to inflict Hits using EMP Grenades may not otherwise attack or make use of any other special rule or item of Wargear that inflicts Hits or Wounds on a model in the same Assault phase (but may participate in Sweeping Advances as normal).

## FIRESIGHT DRONE UPLINK

If a model with a Firesight Drone Uplink remained stationary in the previous Movement phase, up to 3 models with the Drone unit Sub-Type in that unit may use that model's Ballistic Skill in place of their own when making Shooting Attacks, except when making Snap Shots.

## GEO-LOCATOR BEACON

As long as a model with this special rule is deployed on the battlefield, the controlling player may choose to re-roll all failed Reserves roll they make.

## GRAVITY WAVE PROJECTOR

Each an enemy unit charges a unit that includes at least one model with a Gravity Wave Projector, subtract 1 from the result of the charge roll.

## GUE'VESA STANDARD

A unit that includes at least one model with a Gue'Vesa Standard adds +1 to the Wounds score used to decide if they win a Combat in the Assault phase.

## HOLOPHOTON COUNTERMEASURES

If a unit includes at least one model equipped with Holophoton Countermeasures, then that unit can make the Holophoton Countermeasures Reaction.

## ADVANCED REACTION:

### HOLOPHOTON COUNTERMEASURES

This Reaction can be made during the opposing player's Shooting phase, when the unit is selected as a target for a Shooting Attack. All models in the unit that triggered the reaction must fire Snap Shots when making that Shooting Attack. Enemy models with the Night Vision special rule and models with the Primarch Unit Type ignore this effect.

## **HOLOPROJECTOR**

Precision Shots and Precision Strikes can never be allocated to a model with a Holoprojector so long as there are any other models in its unit.

## **HOMING BEACON**

Once per battle, during the controlling player's Movement phase, an unengaged unit equipped with a Homing Beacon can place it on the battlefield. If you do, place a Homing Beacon marker within 3" of the unit and more than 1" from enemy models; the marker is ignored for the purpose of all game rules and remains there for the remainder of the game.

If the first placed model of a Deep Strike assault is placed within 12" of a Homing Beacon marker, that model does not scatter and the Deep Strike Assault cannot be Disordered.

Additionally, if the Flanking Marker of a Flanking Assault is placed within 12" of a Homing Beacon marker, that Flanking Assault cannot be Disordered.

## **HOVER DRONE**

A model that selects a Hover Drone as an upgrade changes its Movement characteristic to 12" and gains a Jet Pack and the Battle Hardened (1) special rule.

## **HYPERACTIVE NYMUNE ORGAN**

All models in a unit that includes at least one model with a Hyperactive nymune organ gains the Fleet (1) special rule. If a model in that unit already has the Fleet (X) special rule, improve the value X of its Fleet special rule by 1 instead.

## **KROOT CAVALRY MOUNTS**

### **KROOTOX**

A Character model which selects a Krootox as an upgrade changes its Unit Type to Cavalry and gains the Monstrous unit Sub-Type, in addition to any it already has, may choose to gain the Skirmish unit Sub-Type, increases its Toughness and Wounds characteristics by 2 and gains the Relentless and Hammer of Wrath (3) special rules.

### **KNARLOC**

A Character model which selects a Knarloc as an upgrade changes its Unit Type to Cavalry, may choose to gain the Skirmish unit Sub-Type, changes its Movement characteristic to 12" and gains the Outflank and Hammer of Wrath (1) special rule.

## **KALAMANDRA**

A Character model which selects as a Kalamandra as an upgrade changes its Unit Type to Cavalry, may choose to gain the Skirmish unit Sub-Type, changes its Movement characteristic to 12", and gains the Infiltrate, Outflank and Hammer of Wrath (2) special rules.

## **MULTI-FUNCTION SURVEYOR**

A model equipped with a Multi-Function Surveyor has the Battlesmith (5+) special rule.

## **MULTI-SPECTRAL SENSOR**

A unit that includes at least one model with a Multi-spectral Sensor gains the following benefits:

- The unit ignores all the effects of Night Fighting;
- When the unit makes the Interceptor Advanced Reaction, the reaction does not cost the controlling player a point from their Reaction Allotment. This does not allow the unit to make more than one Reaction per Phase, but does allow the controlling player to exceed the normal three Reactions limit in a given Phase.

## **PHOTON GRENADES**

Enemy units that successfully charge a unit equipped with Photon Grenades do not receive additional attacks for having charged, unless the target of the charge is Pinned or Falling Back.

## **PULSE ACCELERATOR**

Whilst a unit includes at least one model equipped with a Pulse Accelerator, the maximum range of all Pulse weapons used by models in that unit is increased by 6".

## **SHAMANIC ANCESTRY**

A model with Shamanic ancestry gains the Psyker unit Sub-Type and selects one of the Psychic Disciplines from the Core Disciplines list.

## **STABILISING ANCHORS**

The controlling player of a unit that includes models with Stabilizing Anchors may activate them at the start of any of their own turns.

Once the Stabilising Anchors are activated, all models with Stabilising Anchors in the unit are affected by the following conditions until the beginning of the controlling player's next turn:

- The model may not move, Run, charge or make any Reactions other than the Mass Covering Fire, Overwatch and Return Fire Reactions.
- The first time the model makes a Shooting Attack during the controlling player's Shooting

phase, it may shoot twice with all Heavy and Ordnance weapons it is equipped with (except for One Shot weapons).

- The model's Weapon Skill characteristic is reduced to 1.
- If an enemy unit attempts a Sweeping Advance against the model's unit, it is automatically successful and the unit is destroyed.

### **STEALTH FIELD GENERATOR**

Whenever targeted by a Shooting Attack, the range between an attacking unit and a unit that includes at least one model with a Stealth Field Generator is considered to be 3" further than the actual range between the two units (this is cumulative with any other modifiers to range imposed by special rules, such as Night Fighting, or Wargear). Enemy models with the Night Vision special rule and models with the Primarch Unit Type ignore this effect.

### **STRUCTURAL ANALYZER**

Instead of making a Shooting Attack in the controlling player's Shooting phase, a model with a Structural Analyzer can target an enemy unit within 30". If it does so, then until the end of the Shooting Phase treat the Toughness of models in that unit as if it were 1 lower when rolling To Wound (Instant Death thresholds are unaffected).

### **T'AU BATTLESUITS**

#### **XV22 STEALTH BATTLESUIT**

A XV22 Stealth Battlesuit grants a 2+ armour save.

#### **XV25 STEALTH BATTLESUIT**

A XV25 Stealth Battlesuit grants a 3+ armour save.

#### **XV46 VANGUARD BATTLESUIT**

A XV46 Vanguard Battlesuit grants a 3+ armour save.

#### **XV46-4 VANGUARD VOID BATTLESUIT**

A XV46 Vanguard Void Battlesuit grants a 2+ armour save.

#### **XV8 CRISIS BATTLESUIT**

A XV8 Crisis Battlesuit grants a 3+ armour save.

#### **XV8-02 CRISIS-IRIDIUM BATTLESUIT**

A XV8 Crisis Battlesuit grants a 2+ armour save.

#### **XV81 CRISIS BATTLESUIT**

A XV81 Crisis Battlesuit grants a 3+ armour save.

#### **XV84 CRISIS BATTLESUIT**

A XV4 Crisis Battlesuit grants a 3+ armour save.

#### **XV86 COLDSTAR BATTLESUIT**

A XV86 Coldstar Battlesuit grants a 2+ armour save. In addition, if a unit includes any model with

a XV86 Coldstar Battlesuit, all models with the Drone unit Sub-Type in that unit use that model's Movement characteristic, instead of their own.

### **XV89 CRISIS BATTLESUIT**

A XV89 Crisis Battlesuit grants a 2+ armour save. When a unit that includes any models equipped with XV89 Crisis Battlesuits activates its Jet Packs, it receives only a +3 bonus to its Movement characteristic, rather than +6.

### **XV9 HAZARD BATTLESUIT**

A XV9 Hazard Battlesuit grants a 3+ armour save.

#### **XV9-02 HAZARD-IRIDIUM BATTLESUIT**

A XV9 Hazard Battlesuit grants a 2+ armour save.

### **XV95 GHOSTKEEL BATTLESUIT**

A XV95 Ghostkeel Battlesuit grants a 3+ armour save. When a model equipped with a XV95 Ghostkeel Battlesuit suffers an unsaved Wound with the Instant Death special rule, it is not immediately removed as a casualty, but instead loses 3 Wounds instead of one for each unsaved Wound with the Instant Death special rule inflicted on it.

### **XV104 RIPTIDE BATTLESUIT**

A XV104 Riptide Battlesuit grants a 2+ armour save. When a model equipped with a XV104 Riptide Battlesuit suffers an unsaved Wound with the Instant Death special rule, it is not immediately removed as a casualty, but instead loses 3 Wounds instead of one for each unsaved Wound with the Instant Death special rule inflicted on it.

### **XV107 R'VARNA BATTLESUIT**

XV107 R'varna battlesuit grants a 2+ armour save. When a model equipped with a XV107 R'varna battlesuit suffers an unsaved Wound with the Instant Death special rule, it is not immediately removed as a casualty, but instead loses 3 Wounds instead of one for each unsaved Wound with the Instant Death special rule inflicted on it.

### **XV109 Y'VAHRA BATTLESUIT**

XV109 Y'vakra Battlesuit grants a 2+ armour save. When a model equipped with a XV109 Y'vakra Battlesuit suffers an unsaved Wound with the Instant Death special rule, it is not immediately removed as a casualty, but instead loses 3 Wounds instead of one for each unsaved Wound with the Instant Death special rule inflicted on it.

### **KV128 STORMSURGE BATTLESUIT**

A KV128 Stormsurge Battlesuit grants a 3+ armour save. A model equipped with a KV128 Stormsurge Battlesuits automatically passes Pinning tests and, when it suffers an unsaved Wound with the Instant

Death special rule, it is not immediately removed as a casualty, but instead loses D3 Wounds instead of one for each unsaved Wound with the Instant Death special rule inflicted on it.

### **Mx39 TA'UNAR BATTLESUIT**

A Mx39 Ta'unar Battlesuit grants a 2+ armour save. When a model equipped with a Mx39 Ta'unar Battlesuit suffers an unsaved Wound with the Instant Death special rule, it is not immediately removed as a casualty, but instead loses D3 Wounds instead of one for each unsaved Wound with the Instant Death special rule inflicted on it.

### **TOXIN SACS**

All close combat attacks made by models in a unit that includes at least one model with Toxin sacs gain the Poisoned (4+) special rule.

### **VULTUROUS WINGS**

Vulturous wings count as a Jump pack, except the model does not have to take Dangerous Terrain Tests for starting or finishing its move in Difficult Terrain during a turn in activates its Jump pack.

### **T'AU SHIELD GENERATORS**

Invulnerable saves conferred by Shield Generators are not cumulative with invulnerable saves conferred by any other source, including other Shield Generators.

#### **MV4 SHIELD GENERATOR**

A model with a MV4 Shield Generator has a 5+ invulnerable save.

#### **MV36 GUARDIAN FIELD GENERATOR**

A model with a MV36 Guardian field generator has a 5+ invulnerable save. All other models in that model's unit gain a 6+ invulnerable save.

#### **MV52 SHIELD GENERATOR**

A model with a MV52 Shield Generator has a 4+ invulnerable save.

#### **MV104 SHIELD GENERATOR**

A model with a Mv104 Shield Generator has a 5+ invulnerable save. If the model Activates its Nova Reactor, then this invulnerable save is increased to 4+ until the end of the current turn.

#### **MV107 INTEGRATED SHIELD GENERATOR**

A model with a Xv107 Integrated Shield Generator has a 4+ invulnerable save. If the model Activates its Nova Reactor, then this invulnerable save is increased to 3+ until the end of the current turn.

#### **MV109 INTEGRATED ECLIPSE SHIELD GENERATOR**

A model with a Xv109 Eclipse Shield Generator has a 5+ invulnerable save, which is increased to

a 4+ invulnerable save against Ranged Attacks if the firing model is within 12" and against Close Combat attacks. If the model Activates its Nova Reactor, then it is improved to 3+ against Close Combat attacks until the end of the current turn.

### **MV128 STORM SHIELD GENERATOR**

A model with a MX128 Storm Shield Generator has a 5+ invulnerable save, which is improved to a 4+ invulnerable save against Shooting attacks from Knight, Titan and Gargantuan models.

### **MX39 SUPREMACY SHIELD GENERATOR**

A model with a MX39 Supremacy Shield Generator has a 5+ invulnerable save, which is improved to a 4+ invulnerable save against Shooting attacks.

In addition, the first time each turn that a model equipped with a MX39 Supremacy Shield Generator suffers an unsaved Wound from a weapon with the Destroyer type or the Destructor special rule, reduce the amount of Wounds lost to 1. Afterwards, the model may not make invulnerable saves until the end of the current turn.

### **MANTA SHIELD PROJECTOR**

A model equipped with a Manta Shield Projector has a 4+ invulnerable save.

### **T'AU SUBSYSTEMS**

T'au subsystems represent a number of upgrades, typically mounted on Vehicles and Battlesuits. A model can only ever have one of the same Subsystem. Subsystems that are equipped to Vehicle models are not weapons and cannot be affected by the Weapon Destroyed result on the Vehicle Damage Table.

### **ADVANCED TARGETING SYSTEMS**

All ranged weapons of a model equipped with an Advanced Targeting System gain the Precision shots (6+) special rule, except when making Snap Shots.

### **BLACKSUN FILTER**

A model equipped with a Blacksun Filter is unaffected by the effects of the Night Fighting rules. Additionally, a unit that includes any models equipped with Blacksun Filters always counts its Initiative characteristic as 5 when taking Blind tests.

### **COUNTERFIRE DEFENSE SYSTEMS**

Whenever a model equipped with a Counterfire Defense System fires Snap Shots, add 1 to the To Hit roll.

### **DECOY LAUNCHERS**

When an enemy unit makes a Reaction that targets a unit containing any models with this upgrade, any number of models in that unit that have Decoy Launchers can activate them. If you do, all models in that unit that activated their Decoy Launchers gain the Shrouded (5+) special rule against any Shooting Attacks made as part of that Reaction. A model can only activate its Decoy Launchers once per battle.

#### **DISRUPTION POD**

A model equipped with a Disruption Pod gains a 6+ Cover Save, even whilst in the open. If the model would already receive a Cover Save from any other source, the Disruption Pod improves that Cover Save by +1 instead.

#### **DRONE CONTROLLER**

For each model with a Drone Controller in a unit, up to two models with the Drone unit Sub-Type in that unit (including Attached Drones) may use that model's Ballistic Skill in place of their own when making Shooting Attacks, except when making Snap Shots. If a model with a Drone Controller is embarked upon a Transport, then that Transport's Attached Drones may also use the model's Ballistic Skill.

#### **EARLY WARNING OVERRIDE**

When any enemy unit is deployed to the battlefield from Reserves, a unit that includes at least one model with an Early Warning Override may make the Interceptor Advanced Reaction (see the Horus Heresy: Age of Darkness rulebook, page 309) without expending a point of the Reactive player's Reaction Allotment.

If the controlling player chooses to have the Reaction not expend a point of their Reaction Allotment, only models equipped with an Early Warning Override may fire as part of that Reaction.

This does not allow the unit to make more than one Reaction per Phase, but does allow the controlling player to exceed the normal three Reactions limit in a given Phase.

#### **FLECHETTE DISCHARGER**

At Initiative Step 10 of each combat, each enemy unit in that combat that is engaged with a model equipped with a Flechette Discharger suffers a number of Hits at S4, AP- equal to the number of models in that unit that are within 2" the model equipped with a Flechette Discharger. Those Hits are allocated in the same way as those inflicted by close combat attacks and any Wounds inflicted count towards Combat Resolution for that round.

#### **NETWORKED WEAPON INTERFACE**

If a model is equipped with a Networked Weapon Interface, choose one of the model's ranged weapons when selecting your army list. That weapon gains the Twin-Linked special rule.

#### **POSITIONAL RELAY**

If the first placed model of a Deep Strike assault is placed within 6" of a friendly model equipped with a Positional Relay, that model does not scatter.

#### **SENSOR SPINES**

A model equipped with Sensor spines gains the Move Through Cover special rule and automatically passes Dangerous Terrain tests.

#### **STIMULANT INJECTOR**

A model equipped with a Stimulant Injector has the Feel No Pain (5+) special rule.

#### **TARGET LOCK**

When a unit that contains at least one model equipped with a Target Lock makes a Shooting Attack, models with Target Locks in the unit can shoot at a different target to the rest of their unit. Each model with a Target Lock can target a different unit, in which case resolve each Shooting Attack against each target sequentially in order.

Once these Shooting Attacks have been resolved, resolve the Shooting Attacks made by the rest of the unit. These must be at a different target, which cannot be a unit forced to Disembark as a result of the models with Target Locks' initial Shooting Attack.

#### **VECTORED RETRO-THRUSTER**

A model equipped with Vectored Retro-Thrusters gains the Fleet (2) and Hit & Run special rules.

#### **VELOCITY TRACKER**

Each time a model with a Velocity Tracker makes a Shooting Attack, the controlling player can choose to have all of its weapons gain the Skyfire special rule until the end of the current phase.

## DRAMATIS PERSONAE

The following section contains rules for some of the most major representants of the T'au Empire; exemplars of the greater good whose deeds and valour have passed into legend, and inspire others to follow their example even in the face of the most wretched adversity.

Several of these characters have the Doctrine of War (X) special rule with a specific Doctrine of War specified. If that is the case, that Doctrine of War must be selected for that Character's Detachment.

# DARKSTRIDER.....100 POINTS

|             | M | WS | BS | S | T | W | I | A | LD | SV |
|-------------|---|----|----|---|---|---|---|---|----|----|
| Darkstrider | 6 | 4  | 5  | 3 | 3 | 2 | 3 | 3 | 8  | 5+ |

## UNIT COMPOSITION

- 1 Shas'el

## WARGEAR

- Shade
- Photon Grenades
- Markerlight
- Target Lock
- Blacksun Filter
- Structural Analyzer
- Recon Armour

## UNIT TYPE

- Infantry (Skirmish, Light, Character, Unique)

## SPECIAL RULES

- Doctrine of War (X)
- Supporting Fire
- Battle-Hardened (1)
- Independant Character
- Infiltrate
- Pathfinder
- Scout
- Fight on Foot
- Fighting Retreat

## SHADE

Shade is counted as a 'Pulse' weapon for those rules that affect those weapons.

| WEAPON | RANGE | STR | AP | TYPE                                              |
|--------|-------|-----|----|---------------------------------------------------|
| Shade  | 18"   | 5   | 5  | Assault 2, Pinning, Breaching (6+), Ignores Cover |

## FIGHT ON FOOT

Darkstrider may not be an army's Warlord.

If Darkstrider is included in a Flanking Assault, then the controlling player adds 1 to the roll when rolling to see if that Flanking Assault arrives from reserves.

## FIGHTING RETREAT

Darkstrider, and all models in the unit he joins, have the Hit & Run special rule.

Additionally, after Darkstrider's unit has made Shooting Attacks as part of any reaction (including Supporting Fire), his unit can move up to 3" directly away from the enemy unit that triggered the Reaction. In the case of the Overwath reaction, this is done before resolving the charge distance.

**COMMANDER SHADOWSUN .....230 POINTS**

**HERO OF THE GREATER GOOD**

If O'Shaserra's army's Warlord has the Failure is Not an Option special rule, she still gains the benefits of her Exemplar of Kauyon Warlord Trait, even though she is not the Warlord.

**WARLORD TRAIT: EXEMPLAR OF KAUYON**

If O'Shaserra is your army's warlord, she must have the following Warlord Trait.

**Exemplar of Kauyon:** If O'Shaserra is your Warlord, then after all units have been deployed (including Infiltrators, but before Scouts redeploy), her controlling player may select up to three units with the Stealthed sub-type in her army. That player can immediately redeploy those units as if they were being deployed normally as part of their controlling player's army. If a Transport is redeployed in this way, any units that are embarked inside remain inside; if a unit that is embarked inside a transport or is deployed as part of a special deployment type (for instance Infiltrate or Deep Strike) is redeployed, then it is no longer embarked, infiltrating, or part of that special deployment. This special rule can be used to deploy a unit that was in reserves onto the battlefield, and a unit that was on the battlefield in reserves. All other rules and restrictions when placing the unit must be followed (E.G. a Zooming Flyer may not be deployed already on the battlefield, for instance). In addition, O'Shaserra's army may make one additional Reaction per turn in any one of the opposing player's Phases, as long as she has not been removed as a casualty. This additional Reaction may only be made by the a unit with the Stealthed Unit sub-Type and does not allow any unit to make more than one Reaction per Phase.

**MV37 ADVANCED GUARDIAN DRONE**

An MV37 Advanced Guardian Drone is a Unit Upgrade Drone with the following profile:

|                              | M  | WS | BS | S | T | W | I | A | LD | SV |
|------------------------------|----|----|----|---|---|---|---|---|----|----|
| MV37 Advanced Guardian Drone | 12 | 2  | 2  | 3 | 4 | 1 | 4 | 1 | 7  | 4+ |

**WARGEAR**

- MV37 Advanced Guardian field generator

**MV37 ADVANCED GUARDIAN FIELD GENERATOR**

A model with an MV37 Advanced Guardian Field Generator has a 4+ Invulnerable save, and all other models in that model's unit have a 5+ Invulnerable save so long as this model remains part of the unit.

## MV59 ECLIPSE SHIELD GENERATOR

O'Vesur Ra'lai has a 4+ invulnerable save, which is increased to a 3+ invulnerable save against Ranged Attacks if the firing model is more than 12" away.

*Continued next page*

**WARLORD TRAIT: THE ASSASSIN’S RESOLVE**

If O’Vesur Ra’lai is your army’s warlord, he must have the following Warlord Trait.

**The Assassin’s Resolve:** O’Vesur Ra’lai gains the Fear (1) special rule. Whilst an enemy model with the Independant Character special rule is under the effect of O’Vesur Ra’lai Fear special rule, then the Leadership penalty of inflicted by the Fear special rule is also applied to that model’s Weapon Skill and Ballistic Skill characteristics. Models with the Fearless special rules are unaffected. In addition, O’Vesur Ra’lai’s army may make one additional Reaction per turn in any one of the opposing player’s Phases, as long as he has not been removed as a casualty. This additional Reaction may only be made by O’Vesur Ra’lai and does not allow any unit to make more than one Reaction per Phase.

**MV72 BLACKLIGHT MARKER DRONE**

An MV72 Blacklight Marker Drone is a Unit Upgrade Drone with the following profile:

|                                 | M  | WS | BS | S | T | W | I | A | LD | SV |

- Cadres of Battle
- Supporting Fire
- Pride of the Shas'o
- Battle-Hardened (1)
- Preferred Enemy (Astra Militarum)
- Independant Character
- Warlord Trait: By My Arm, Obliteration

## OPTIONS

- May take up to two unit upgrade drones from the following list:
  - MV1 Gun Drone .....+10 points
  - MV4 Shield Drone .....+10 points
  - MV7 Marker Drone.....+10 points
  - MV52 Shield Drone .....+15 points
  - MV62 Command drone ..... +25 points

## OVERCLOCKED SHIELD GENERATOR

O'Rmyr has a 3+ invulnerable save. If O'Rmyr is destroyed, before removing him from the battlefield, each unit (friend and foe) within D6" suffers D6 Hits at Strength 8, AP-.

## WARLORD TRAIT: BY MY ARM, OBLITERATION

If O'Rmyr is your army's warlord, he must have the following Warlord Trait.

**By My Arm, Obliteration:** When a friendly unit with the Supporting Fire special rule, except O'Rmyr's own unit, makes a Shooting Attack, it gains +1 to the Strength of that attack if either of the following conditions are fulfilled:

- O'Rmyr previously made a Shooting Attack against the target of that attack in the same phase.
- The unit is making that Shooting Attack as part of a Reaction, and O'Rmyr's unit is also making Shooting Attacks as part of that same Reaction.

In addition, an army whose Warlord has this trait may make one additional Reaction during each of the opposing player's Shooting phases.

**COMMANDER LONGSTRIKE .....180 POINTS**

|             | M  | BS | ARMOUR |      |      | HP | TRANSPORT |
|-------------|----|----|--------|------|------|----|-----------|
|             |    |    | FRONT  | SIDE | REAR |    | CAPACITY  |
| T'au Sha'ng | 14 | 7  | 13     | 12   | 10   | 4  | -         |

**UNIT COMPOSITION**

- T'au Sha'ng

**UNIT TYPE**

- Vehicle (Skimmer, Unique)

**WARGEAR**

- Turret-mounted Railgun (with Solid Shot and Submunition Shot)
- XV02 Pilot Battlesuit
- Blacksun Filter
- 2 Attached MV1 Gun Drones

**SPECIAL RULES**

- Doctrine of War (Kauyon)
- Night Vision
- Warlord Trait: Some Traditions Refuse to Die

**OPTIONS**

- May replace both Attached MV1 Gun Drones with:
  - 2 Attached MV7 Marker Drones .....free
  - 2 Pintle-mounted Smart Missile Systems.....+10 points
  - 2 Pintle-mounted Burst Cannons .....+10 points
- May take up to two:
  - Hull (front) Mounted Seeker Missile .....+10 points each
- May take any of the following:
  - Decoy Launcher .....+10 points
  - Sensor Spines .....+10 points
  - Flechette Discharger .....+10 points
  - Disruption Pod .....+10 points

**XV02 PILOT BATTLESUIT**

A model with a XV02 Pilot Battlesuit gains the Night Vision and Cadres of Battle special rule, has a 5+ invulnerable save, and, if it makes a Shooting Attack as part of a Reaction, it may fire with all of its weapons, not just Defensive weapons.

**WARLORD TRAIT: SOME TRADITIONS REFUSE TO DIE**

T'au Sha'ng may be your Warlord when selecting the Armoured Interdiction Cadre of Battle, replacing the upgraded Hammerhead. When doing so, he has the following Warlord Trait, instead of the Hammerhead Ace Warlord Trait.

**Some Traditions Refuse to Die:** When T'au Sha'ng makes a Shooting Attack using his Railgun (before rolling To Hit), the controlling player may choose to have all successful To Hit rolls be Precision Shots. However, if that player does so, T'au Shan'g's unit may not make Cover saving throws or Shrouded damage mitigation rolls until the end of the following turn. If T'au Shan'g is an army's Warlord, the enemy player never scores any mission objectives that grant Victory Points for removing the Warlord as a casualty. In addition, T'au Sha'ng's army may make one additional Reaction per turn in any one of the opposing player's Phases, as long as he has not been removed as a casualty. This additional Reaction may only be made by a Vehicle unit and does not allow any unit to make more than one Reaction per Phase.

# AUN'SHI ..... 150 POINTS

|         | M | WS | BS | S | T | W | I | A | LD | SV |
|---------|---|----|----|---|---|---|---|---|----|----|
| Aun'shi | 6 | 5  | 3  | 3 | 3 | 3 | 5 | 4 | 10 | -  |

## UNIT COMPOSITION

- 1 Aun'shi

## UNIT TYPE

- Infantry (Character, Unique)

## WARGEAR

- Honour Blade
- Photon Grenades
- EMP Grenades
- MV52 Shield Generator

## SPECIAL RULES

- Doctrine of War (X)
- Failure Is Not an Option
- Invocation of the Elements
- Counter-Attack (1)
- Peerless Blademaster
- Stubborn
- Eternal Warrior
- Warlord Trait: Exemplar of the Selfless Cause

## PEERLESS BLADEMASTER

At the start of each round of close combat in which Aun'shi is fighting, the controlling player selects either the Patient Blade or the Killing Blade. Aun'shi gains the listed benefit for the selected option during that round of close combat.

- **The Patient Blade:** Aun'shi's Weapon Skill characteristic is increased to 7 and his Initiative characteristic is decreased to 1.
- **The Killing Blade:** Aun'shi's Attacks characteristic is increased to 5, and the Rending (X) special rule of his Honour Blade is improved to Rending (4+).

## PRIMARCH

### AUN'VA ..... 300 POINTS

|        | M  | WS | BS | S | T | W | I | A | LD | SV |
|--------|----|----|----|---|---|---|---|---|----|----|
| Aun'va | 12 | 1  | 3  | 3 | 3 | 4 | 1 | 1 | 10 | -  |

#### UNIT COMPOSITION

- 1 Aun'va

#### UNIT TYPE

- Infantry (Character, Unique)

#### WARGEAR

- Paradox of Duality
- Hover Drone
- Photon Grenades
- Jet Pack

#### SPECIAL RULES

- Doctrine of War (X)
- Failure Is Not an Option
- Master of the Undying Spirit
- The Price of Ultimate Failure
- Battle-Hardened (1)
- Fearless
- Warlord Trait: Exemplar of the Selfless Cause

#### PARADOX OF DUALITY

Aun'va, as well as any models with the Ethereal Guardians special rule in his unit, count their Toughness as being 2 higher than it is for the purpose of To Wound rolls (Instant Death thresholds are unaffected) and have a 2+ invulnerable save against attacks which would cause Instant Death.

#### MASTER OF THE UNDYING SPIRIT

Aun'va always gains the benefits of all four Invocations of the Elements (see the Invocation of the Elements special rule).

#### THE PRICE OF ULTIMATE FAILURE

If Aun'va is removed as a casualty, before removing him from the battlefield, each friendly unit with the T'au Empire subfaction that can draw Line of Sight to him must take a Morale test, even if it is engaged. Each unit that failed must Fall Back (any Pinning checks caused by the Failure Is Not an Option special rule are resolved afterwards). If this causes a friendly unit engaged in melee to Fall Back, enemy units may attempt a Sweeping Advance and Consolidate as normal.

# BASE SIZE GUIDE

All sizes are given in millimeters. Unless otherwise specified, unit characters use the same base size as the rest of their unit. Base sizes are given using the sizes listed on the Games Workshop website, when available. It's fine to use what you have or approximations, just clear it out with your opponent first.

## Changelog

### V1.7:

- The file has been ported to the new font style.
- New unit: XV89 Crisis Battlesuits. Heavily armoured battlesuits which only receive half the effectiveness of Jet Packs.
- New unit: XV15 Stealthsuits. The first model of Stealthsuit, entering the field of battle once more.
- Unit Upgrade Drones section moved to the appendice, right after Unit Types.
- Attached Drones have lost the ability to split fire.
- The Doctrines of War: clarified that T'au are allowed to bring allied detachment with the same subfaction so long as their doctrine of war differs.
- Crisis Shas'o: correctly identified the Shas'o Battlesuit as the XV85 battlesuit, and not the smaller XV8-02.
- Hazard Shas'o: added Bitter Duty special rule. You probably should still not be running him with MV46, but this way all the Shas'yr units are coherent with having the rule.
- Coldstar Shas'o: added missing point cost for Command Drones.
- Crisis Heavy Support Team: Upped the amount of hardpoint (weapons and supporting systems) slots from 2 to 3 (to correspond better to the suit's actual lore), added the Heavy sub-type, and increased the point cost per model by 5 points.
- Riptide: Reduced Instant Death protection; Instant Death wounds now cause the loss of 3 wounds to the model instead of D3.
- Tetras, Piranhas, Remoras: added new Fire Caste Vanguard Shoal special rule, fonctionning identically to Harbingers of the Legion.
- Hazard Suits: added Bitter Duty special rule.
- Ghostkeel: Added missing armour rules to the wargear section, including Instant Death protection.
- Y'vakra: Reduced Instant Death protection; Instant Death wounds now cause the loss of 3 wounds to the model instead of D3.
- Barracuda, Razorshark, Sun Shark: Added Air Caste Hunter Cadre special rule (allows the use of the combat air patrol advanced reaction also available to solar auxillia)
- Razorshark: removed nonfunctional Fast sub-type; +2 Movement characteristic.
- R'varna: Reduced Instant Death protection; Instant Death wounds now cause the loss of 3 wounds to the model instead of D3.
- Commander Ra'lai: Warlord trait wording changed to cover corner cases regarding fear-immune models that do not have the Fearless special rule.
- Commander Longknife was given his XV89 battlesuit.
